

Task 9 - Create Forms and Functions in a Submenu and Attach the Submenu to Batch4/Batch5

Objective

To create a custom submenu containing forms and functions and attach it to the **Batch4/Batch5** menu in Oracle Forms for easy navigation.

Description

In this task, a custom submenu was created in Oracle Forms and configured with the required forms and menu functions. The submenu was then attached to the existing **Batch4/Batch5** menu, enabling users to access the application modules through a structured and user-friendly navigation menu.

Steps Performed

1. Opened Oracle Forms Builder.
2. Created a new menu module.
3. Added the required submenu items.
4. Associated forms and menu functions with each submenu item.
5. Attached the custom submenu to the **Batch4/Batch5** menu.
6. Saved and compiled the menu module.
7. Executed the application and verified the submenu functionality.

Result

A custom submenu was successfully created and integrated with the **Batch4/Batch5** menu. The menu allows users to navigate between different forms and execute the associated functions efficiently.

Concepts Used

- Oracle Forms Builder
- Menu Module
- Submenu Creation
- Menu Items
- Form Navigation
- Menu Integration
