

Task 8 - Implement Calendar Functionality for Hire Date Field

Objective

To implement a **Calendar** feature for the **Hire Date** field, allowing users to select a date using a calendar instead of entering it manually.

Description

In this task, calendar functionality was implemented for the **Hire Date** field in Oracle Forms. A built-in calendar was associated with the field, enabling users to choose a valid date through a graphical calendar interface. This improves user experience, ensures accurate date entry, and reduces formatting errors.

Steps Performed

1. Opened Oracle Forms Builder.
2. Selected the **Hire Date** field in the Employees block.
3. Configured the field to use the built-in calendar functionality.
4. Verified the date format for the Hire Date field.
5. Compiled and executed the form.
6. Opened the calendar and selected a date.
7. Confirmed that the selected date was displayed correctly in the field.

Result

The **Hire Date** field was successfully integrated with a calendar, allowing users to select dates easily and ensuring accurate date entry.

Concepts Used

- Oracle Forms Builder
- Date Item
- Calendar Functionality
- Date Validation
- User Interface Enhancement
